

# Pinealon

Research peptide · 5 mg / vial

## Specifications

|                     |                                                                                       |
|---------------------|---------------------------------------------------------------------------------------|
| CAS number          | 175175-23-2                                                                           |
| Molecular formula   | C <sub>15</sub> H <sub>26</sub> N <sub>6</sub> O <sub>8</sub>                         |
| Molecular weight    | 418.40 g/mol                                                                          |
| HPLC purity         | ≥99%                                                                                  |
| Physical form       | Lyophilized powder                                                                    |
| Vial size           | 5 mg / vial                                                                           |
| Amino-acid sequence | Glu-Asp-Arg                                                                           |
| Storage             | Store lyophilized at -20 °C, protected from light. Stable 24 months from manufacture. |

### Every lot is independently verified

HPLC purity and mass-spec identity are published for every batch. Enter the lot number printed on your vial at [pepbiotics.com/lab-results](https://pepbiotics.com/lab-results) to read the exact certificate of analysis for your material.

## Reconstitution & handling

For laboratory research use only. Handle under aseptic technique. Store sealed vials at -20 °C, protected from light. Not for human or veterinary use.
